

Crowdsourced trading insights.
Mitigating trading risks. Setting a new benchmark.
Clearing out the noise.

WHAT WE DO

The crypto market is the digital wild west. Anything goes - Dubious projects, exaggerated claims and really bad financial advice.

WE FIX THIS

HOW WE DO IT

We're creating a peer-reviewed knowledgebase of trading insights, with a transparent ranking and auctioning platform for trading ideas. Knoks is a curated, information platform for traders and analysts, providing empirically driven, vetted insights.

WHY WOULD IT WORK?

Knoks tackles 3 of the biggest problems in the crypto market:

INFORMATION POLLUTION

The field is overflowing with incoherent information.

WE FIX IT

By providing a platform with clear guidelines as to what counts as an insight: Entry price range, Exit price range, Stop-Loss. TA and FA are also available, but not mandatory.

INFORMATION DISARRAY

Intelligence is spread throughout numerous platforms.

WE FIX IT

By providing a one-stop-shop for financial intelligence, including optional API integrations with most of the biggest exchanges.

INFORMATION DISARRAY

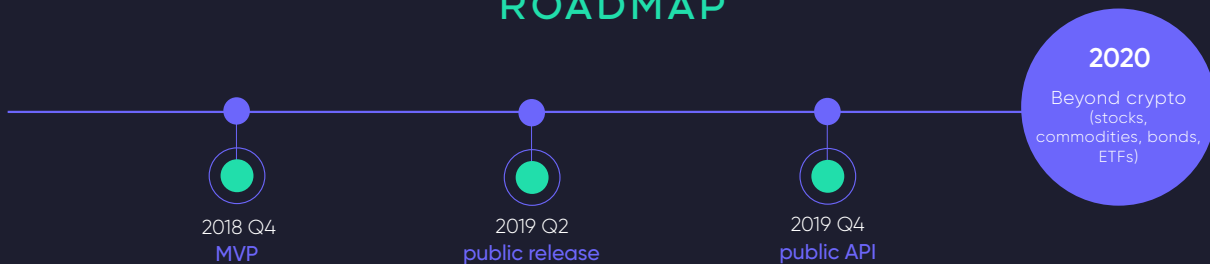

There is no system for measuring quality of analysis.

WE FIX IT

By providing a clear standard of reputation, and compliment that reputation standard by allowing traders to pay only for insights that actually work.
